WHY VIETNAM?

1. THE NUMBER OF CHILDREN NATIONWIDE INCREASES DAILY

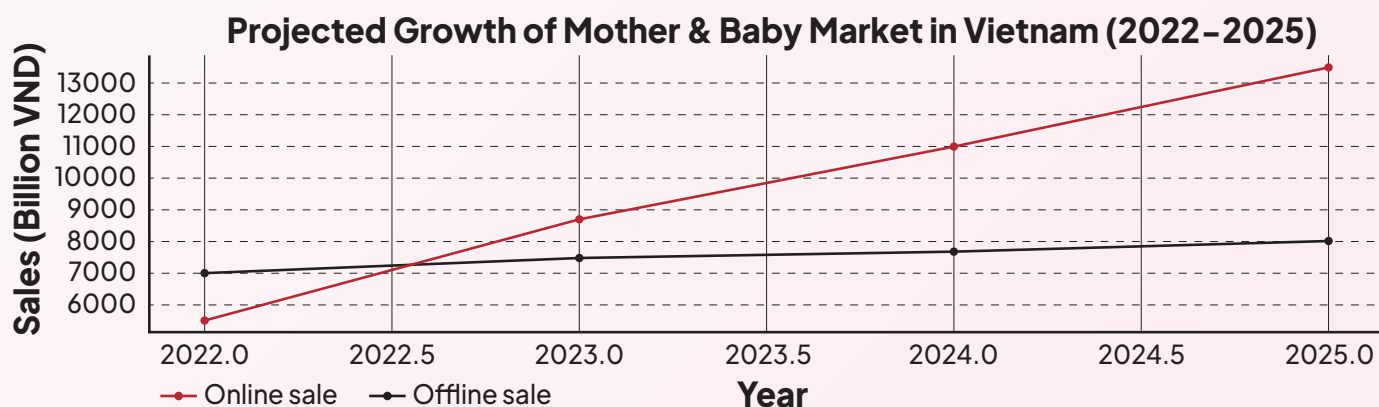

With over 1.5 million children born each year, Vietnam is a leading potential market for the mother and baby industry. Statistics show Vietnam has the highest rate of households with children in Southeast Asia, with 12% of families having children under 1 year old and 20% having children from 1 to 2 years old. Forecasts from DanSo (www.danso.org) predict that by 2024, the number of children born in Vietnam each day will average about 4,726. This creates the premise for the demand in the mother and baby market to continue growing.

2. AVERAGE INCOME AND SPENDING OF PEOPLE

- **Average Income:** According to data from the General Statistics Office, the average income per capita in Vietnam in 2023 reached about 4,500 USD and is expected to continue to increase in 2025 thanks to economic growth. This boosts consumer demand, especially for high-quality products for mothers and babies.
- **Spending level:** Vietnamese consumers increasingly spend on safe, eco-friendly products. Millennials and Gen Z invest in products with natural ingredients and high-tech applications to ensure optimal health for their children.

3. E-COMMERCE AND DIGITAL TRANSFORMATION

- **The explosion of e-commerce:** According to Statista, Vietnam's e-commerce growth rate is ranked among the top 10 countries with the highest e-commerce growth rate in the world (as of December, 2023). This trend is expected to continue to grow at an annual rate of over 50%, as more and more Vietnamese consumers switch to online shopping and participate in livestream sales channels.
- **Impressive revenue growth:** In 2023, the mother and baby industry recorded online revenue exceeding VND 8,708 billion, an increase of more than 57% over the same period last year. At the same time, the number of products sold also increased significantly with about 56.6 million products, an increase of 54% compared to 2022.

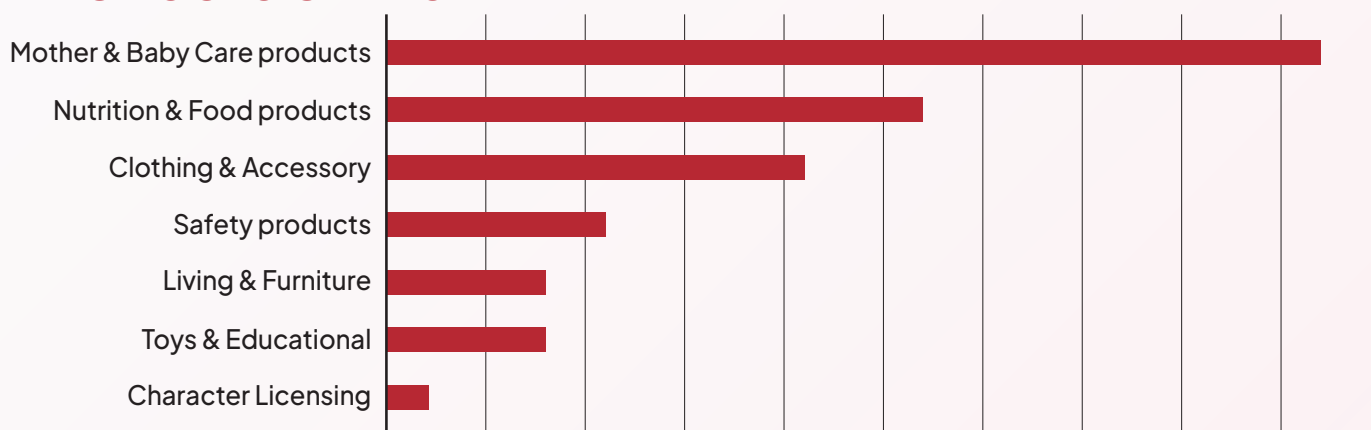

The chart above shows the growth of the mother and baby market in Vietnam from 2022 to 2025, with two main channels being online and offline sales .
