nestique

Unique Time For Me

HWAJINMOL TECH

“Born from Discomfort”

Nestique began with the inconvenience of one family who ran a manufacturing plant for 20 years. Stainless steel plates, PP plates, and ceramic, glass, etc. were commonly used to prepare meals for children, but these materials caused a lot of problems for children and parents.

In 2017, my parents purchased stainless steel plates on the market for my 3-year-old child's meals. However, due to the unique properties of stainless steel, the food cooled quickly, and it was not easy to reheat the food. In addition, the PP plate had severe discoloration and odor, and it was equally difficult to reheat food. Ceramics and glass items were too dangerous to give to children as they could break.

These inconveniences were met with the idea of 'Let's make a good product for children,' resulting in the Nestique plate that launched in 2020 years. Since then, Nestique has gained a lot of popularity from more than one million parents and has grown into the number one brand of baby food trays in Korea.

Nestique's sincerity Chosen by **1M parents.**

**BEST
SELLER**

Rabbit Plates Series

The 'Rabbit Plates Series' was planned to celebrate the Year of Rabbit. The handle is characterized by its rabbit ear and carrot shape. Not only does this series offer a cute design, but its practicality makes it one of Nestique's best sellers.

2023 X-Mas Color

The Christmas series, released to commemorate Christmas, consists of three colors. Among them, the "winter pure" color inspired by ice in the winter, created with Nestique's special technology, gained popularity for its transparency. This series is available for a limited time during the Christmas holiday season.
